JATIN PATNAIK

✆ +91 7978985147 ✉ jatinpatnaik27@gmail.com LinkedIn GitHub

Motivated and detail-oriented Computer Science and Engineering student with hands-on experience in frontend development, web application development, and programming using C++, Python, JavaScript, and SQL. Built projects including a responsive weather web application, personal portfolio website, and library management system. Strong foundation in data structures, object-oriented programming, DBMS, problem-solving, and responsive web design. Seeking opportunities in Frontend Development, Web Development, or Software Development internships.

Education

C.V. Raman Global University **Oct 2022 – May 2026**

Bachelor of Technology in Computer Science and Engineering | CGPA-7.70/10 *Bhubaneswar, India*

Vidwan Junior College **May 2021 – March 2022**

Science | Percentage-60% *Koraput, India*

Modern English School **April 2019 – March 2020**

Percentage-70% *Koraput, India*

Projects

Personal Portfolio Website | HTML, CSS, JavaScript **January, 2026**

- Developed a Personal Portfolio Website to showcase technical skills, academic projects, certifications, and contact information in a professional format.
- Designed a fully responsive and user – friendly interface with structured sections for Skills, Projects, Education and contact.
- Improved web presentation and accessibility using modern frontend design practices and clean layout structure.
- Deployed the website using GitHub Pages for online accessibility and project visibility.

Weather Web Application | HTML, CSS, JavaScript, OpenWeather API **September, 2025**

- Developed a responsive frontend weather application that allows users to search for any city, town, or village and view detailed weather information in real time.
- Integrated OpenWeather API to fetch live weather data including temperature, humidity, wind speed, atmospheric pressure, weather conditions, and location – based forecasts.
- Designed a modern and user – friendly interface with search functionality, dynamic weather icons, and clean responsive layouts for desktop and mobile devices.
- Implemented error handling for invalid locations, failed API responses, and empty inputs to improve usability and reliability.

Library Management System | C++, OOP, File Handling

- Developed a console–based library management system in C++ using object–oriented programming and file handling concepts.
- Implemented functionalities such as adding, searching, updating, and displaying book records.
- Applied classes, file streams, and basic data management logic to organize and maintain records efficiently.
- Improved usability by enabling book search by ID and readable formatted output.

Skills

Programming Languages: C++, Python, JavaScript and SQL

CS Fundamentals: Data Structures and Algorithms, DBMS and Object Oriented Programming(OOP)

Frontend Development: HTML, CSS, Responsive Design and API Integration

Developer Tools: Google Colab, GitHub, Visual Studio Code

Soft Skills: Problem Solving, Adaptability

CERTIFICATIONS

- Automating Real-World Tasks with Python – Coursera
- Configuration Management and the Cloud – Coursera
- Using Python to Interact with the Operating System – Coursera
- Data Science and Machine Learning with Dl, NLP Bootcamp – Udemy
